How to install the Supa-Trac Lite

Preparation

Supa-Trac Lite can be deployed over almost all ground types and conditions without any ground preparation.

Installation

There is no requirement for specialist skills or tools. Supa-Trac Lite comes in sections for ease of use and to install. Start by laying from the top corner and work down in rows and then across until the area is complete.

Connection

Press the integrated security pins from one tile onto the next. Supa-Trac Lite ramps may be required.
